

Big data roadmap and cross-disciplinary community for addressing societal Externalities (BYTE)

Announcing the 1st BYTE Workshop

Workshop on economic, political, legal, social and ethical issues in big data

Date: 11 September 2014

Time: 9.00 – 17.30

Venue: IXXI, the Complex Systems Institute in Lyon

<http://www.ixxi.fr/?p=3117>

The BYTE partners cordially invite you to the first BYTE workshop on the externalities associated with big data.

BYTE will assist European science and industry in capturing the positive externalities and diminishing the negative externalities associated with big data in order to gain a greater share of the big data market by 2020.

The BYTE partners have undertaken a range of research exercises related to big data and open access, social, ethical and legal issues associated with big data, the economics and politics of big data as well as technological and infrastructural issues. The workshop will be a forum for BYTE partners to share these early results, and gain feedback from European and international experts on BYTE findings. The workshop will include a plenary by Kave Salamatian, from the University of Savoie.

The workshop will be hosted by Inria in Lyon, and will be a one-day event. We are particularly inviting experts in the following fields:

- Social sciences (politics, economics, sociologists, etc.)
- Law
- Industry
- Civil society organisations

Participation is free and open to the public. A limited number of travel bursaries are available to European attendees. If you wish to apply for a bursary, please contact: [Stephane Grumbach](#)

We hope you will be able to join us! To register please click [here](#).
