

Project Updates

Work Package 3: Case studies in positive and negative externalities – new deliverable now online!

As part of WP3, BYTE project partners undertook a series of case studies on big data utilisation by stakeholders in different sectors. Case studies involved interviews with case study representatives and hosting expert focus groups to identify the positive and negative externalities evident within these case studies areas. The case studies culminated in the delivery of the following report, which was recently submitted to the European Commission, and is now accessible via the following link:

- Deliverable 3.2 [Case study reports on positive and negative externalities](#)
D3.2 details the key legal, social, ethical, political and economic impacts of big data utilisation by stakeholders within seven vital European sectors: energy; environment; transport; health; culture; utilities/ smart cities; and crisis informatics.

Events

ISCRAM Conference, Kristiansand, Norway – 24 to 27 May 2015

Kush Wadhwa (TRI) represented the BYTE project at the 12th International Conference on Information Systems for Crisis Response and Management (ISCRAM) where he presented on the key findings of the BYTE case study on big data utilisation in crisis informatics. More information about the conference can be found here: <http://iscram2015.uia.no>

European Big Data Value Association Summit, Madrid – 17-19 June 2015

Anna Donovan (TRI) represented the BYTE project at the European Big Data Value Association Summit, which was held in June in Madrid. Anna presented some of the key findings of the big data case studies, including social and economic impacts of big data across seven key European sectors. More information about the summit can be found here: <http://www.bdva.eu/?q=summit>. That summit hosted a number of presentations to inform about the opportunities and challenges presented by big data in Europe.
